SUMMARY

Entry-level Software Engineer with hands-on experience building REST APIs and backend services in Python using FastAPI and Flask, plus data pipelines and machine learning workflows using Pandas and SQL. Comfortable coding, debugging, and testing in Linux environments with Git-based version control. Collaborated on a team-built NLP resume parser that processed 2,000+ resumes and improved model accuracy by 12%, reflecting an ability to contribute to complete, working solutions.

TECHNICAL SKILLS

- **Languages**: Python, Java, JavaScript
- **Backend & APIs**: REST API Design, FastAPI, Flask, Node.js
- **Frontend**: React
- **Data & Machine Learning**: SQL, Pandas, NumPy, Data Cleaning & Analysis, Data Visualization, TF-IDF, LSTM, Model Evaluation
- **Core CS**: Data Structures, Algorithms, Operating Systems, Problem Solving
- **Tools & Practices**: Git, GitHub, Linux, VS Code, Jupyter Notebook, Agile, Scrum, SDLC

Work Experience

Labmentix Pvt. Ltd. **Aug 2025 - Sep 2025**

Data Science / AIML Intern *Bengaluru(remote)*

COMPLETED a 01month internship as Data Science / AIML Intern at Labmentix Pvt. Ltd.,

- **Designed and optimized ML PREPROCESSING pipelines** in **PYTHON**, boosting model ACCURACY and efficiency
- **Performed DATA CLEANING and FEATURE ENGINEERING** to extract ACTIONABLE insights from structured datasets
- **Automated validation TASKS** with scripts, cutting manual effort by **30%** and ensuring DATA QUALITY.
- **Collaborated via GITHUB and LINUX workflows**, improving TEAM reproducibility and experiment tracking.

PROJECTS

Intelligent Resume Parser (NLP) **Nov 2024 - Dec 2024**

- Collaborated with a team to build an NLP-based resume screening system with a Flask REST API, using Git for source control and pytest for unit testing.
- The system used TF-IDF and cosine-similarity ranking to match candidates; performance metrics were analyzed to improve matching accuracy.
- Processed and validated 2,000+ resumes sourced from Kaggle datasets.
- Contributed to documentation covering code structure, API endpoints, and setup instructions for team handoff.

Sentinel Sense - Sentiment Analysis Web App **May 2022 - Jun 2022**

- Collaborated with a team to build a real-time sentiment analysis application using an LSTM model to classify IMDb reviews.
- The pipeline included text preprocessing, tokenization, and feature extraction feeding the model.
- The classifier was deployed through a Flask + React web interface for real-time predictions.
- Took part in sprint planning and backlog grooming under Agile Scrum, version-controlled via GitHub.

EDUCATION

Malla Reddy University **2022 - 2026**

B.Tech, Computer Science and Engineering

- **GPA:** 8.1 / 10

Narayana College **2022**

Intermediate, MPC

- **GPA:** 9.14 / 10

Sri Chaitanya School **2020**

SSC

- **GPA:** 9.84 / 10

CERTIFICATIONS

- Introduction to Python Programming
- Python Data Representations
