SUMMARY

Full-Stack Developer Intern at Ezinore and 2026 Computer Science graduate delivering production systems end to end. Builds and runs an EV truck fleet's digital-twin platform: restored fleet-status accuracy across 100+ live telemetry streams, fixed 30 km GPS drift and migrated the full stack to AWS. Independently shipped three deployed systems, including a FastAPI resume-screening engine (>78% match) and a job-discovery pipeline that raised verified matches by 90%.

SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Backend & Databases: FastAPI, Flask, Node.js, RESTful API Design, PostgreSQL, Drizzle ORM, Next.js

AI & GenAI: LLM Integration (OpenAI GPT-4o-mini, Gemini 1.5 Pro, Groq/LLaMA 3.3 70B), Prompt Engineering

Cloud & DevOps: AWS (EC2), Linux, Docker, GitHub Actions, CI/CD, Git/GitHub, pytest, Agile/SDLC

Data & Automation: Pandas, NumPy, Data Cleaning, Make.com, SerpApi, Google Sheets API (gspread), Telegram Bot API

EXPERIENCE

Full-Stack Developer Intern — Ezinore **Jul 2026 – Present**

- Build and run the real-time digital-twin platform for an EV truck manufacturer client — the FastAPI backend ingesting live vehicle telemetry, the fleet dashboard on top of it, and the AWS EC2 production server; migrated the full stack into the company's AWS account and handle deployments, restarts and log debugging.
- Fixed two production data faults: rewrote reconciliation logic across 100+ live PostgreSQL telemetry streams after fleet-status counters silently dropped inactive vehicles, and traced trucks plotted 30 km offshore to GPS multipath interference, adding a signal-drift correction layer.
- Validate the platform against the real fleet with the on-ground team: live field tests comparing GPS, battery and speed readings with the dashboard, checks on every incoming telemetry field for missing or out-of-range values, and fixes for API failures that only surface on real data.

Data Science / AI-ML Intern — Labmentix Pvt. Ltd. *(Bengaluru, India)* **Aug 2025 – Sep 2025**

- Designed and optimised Python data pipelines and automated data-validation scripts across multiple production datasets, cutting manual effort by 30% while keeping ingestion accurate.
- Standardised the team's GitHub and Linux workflows, making environment setup faster and experiments reproducible.

PROJECTS

Resume Screening & ATS Match Engine **Jul 2026**

Python, FastAPI, Groq/OpenAI, Docker, GitHub Actions, Vercel **Live demo**

- Built a FastAPI microservice that scores resumes against job descriptions at a >78% fuzzy-match threshold, validated on batches of 20–50 resumes, using Pydantic-validated schemas and SHA-256 de-duplication.
- Secured every endpoint with JWT authentication, added pytest coverage for parsing and matching logic, and built a Docker + GitHub Actions CI/CD pipeline to Vercel with automated Google Sheets sync — zero-downtime releases.

AI-Powered Job Search Automation Pipeline **Jul 2026**

Make.com, SerpApi, Groq/LLaMA 3.3 70B, Google Sheets, Telegram

- Automated job discovery end to end: scheduled Make.com workflows pull 50–100 postings a day from 12+ platforms via SerpApi, de-duplicate them and score relevance with a Groq LLM.
- Raised verified job-match yield by 90% with a second LLM classification pass filtering spam, and Telegram failure alerts.

AetherOps: Real-Time SRE Codebase Analyzer **May 2026**

Next.js, TypeScript, Drizzle ORM, PostgreSQL (Neon) **Live demo**

- Designed the PostgreSQL (Neon) schema with Drizzle ORM relational mappings, validated on 10,000+ LOC repositories.
- Built a recursive AI-assisted code-review pipeline that walks a full project tree, flags security and quality issues and ranks fixes by severity.

EDUCATION & CERTIFICATIONS

B.Tech, Computer Science and Engineering — Malla Reddy University, Hyderabad | *GPA: 8.1 / 10* **2022 – 2026**

Intermediate (MPC) — Narayana Junior College | *Percentage: 86%* **2020 – 2022**

SSC (Class 10) — Sri Chaitanya Techno School | *Percentage: 93%* **2019 – 2020**

Certification: Google IT Automation with Python Professional Certificate — Google, 2025
